Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
	10/634,657	NAKAMI, YOSHIHIRO				
Office Action Summary	Examiner	Art Unit				
	Jamares Washington	2625				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

- 1. This application contains claims directed to the following patentably distinct species of the claimed invention:
- I. Species of the first application disclosed on pages 2-4; in particular, the invention of the first application on page 3 line 8 where "...the image processing method in the first application of the invention does not retrieve the shooting information, in the case of successful retrieval of the image processing information.
- II. Species of the second application disclosed on pages 4-7; in particular, the invention of the second application on page 5 lines 4-8 where "The image processing method in the second application of the invention utilizes the shooting information, which is likely to be included in the image file, and even in the case of failed retrieval of the image processing control information, ensures execution of image processing based on at least the shooting condition".
- III. Species of the third application disclosed on pages 7-10; in particular, the invention of the third application described on page 8 line 18 where "...it is preferable that the executing the image processing to the image data is carried out by converting at least part of the shooting information into image processing control information and executing the series of

Application/Control Number: 10/634,657 Page 3

Art Unit: 2625

image processing of the image data according to the converted image processing control

information.

IV. Species of the fourth application disclosed on pages 10-15; in particular, the

invention of the fourth application on page 11 lines 12-24 and page 13 lines 4-13 where the

image file is either a JPEG or TIFF file as described.

V. Species of the fifth application disclosed on pages 15-18; in particular, the

invention of the fifth application on page 15 lines 19-29 where "...an image processing method

that carries out a series of image processing with an image file that stores JPEG data and at least

one of an application marker segment APPO, which represents a JFIF file, an application marker

segment APP1, which is capable of storing shooting information representing a condition of

generating image data, as well as image processing control information for specifying an image

processing condition applied for the processing of the image data on an identical hierarchy and

represents an Exif file, and an application marker segment APP6, which is capable of storing the

image processing control information".

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for

prosecution on the merits to which the claims shall be restricted if no generic claim is finally

held to be allowable. Currently, no claims are generic. There is an examination and search

burden for these patentably distinct species due to their mutually exclusive characteristics. The

species require a different field of search (e.g., searching different classes/subclasses or

Page 4

electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under U.S.C. 101 and/or 35 U.S.C. 112 first paragraph.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of fight to petition under 37 CFR 1.141. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of 4. claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Application/Control Number: 10/634,657 Page 5

Art Unit: 2625

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jamares Washington whose telephone number is (571) 270-1585. The examiner can normally be reached on Monday thru Friday: 7:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, King Poon can be reached on (571) 272-7440. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
